

# Make a Coral Reef Creature!

Choose any organism you would see at a coral reef. If you choose you may select a creature from Endless Ocean, but make sure it's a coral reef creature before you start!

Make a model of the organism using inexpensive household materials and write a paragraph about it.

We will add our creatures to the coral reef mural in the hall.

## Rules:

\*Must be easy to hang  
(not too big or heavy)

\*make large organisms bigger,  
small organisms smaller

\*on coralreef14.wikispaces.com there is a list of 189 coral reef organisms. Pick one from that list OR find your own coral reef creature!

Creativity is the key! If you take a risk and try something that might not be perfect, that's BETTER than trying something really simple that involves no risk. GO FOR IT!

You will turn in:

\*a unique coral reef organism chosen from the list or approved by Mr. Beyer

On your wiki page you will include:

\*a picture of your creature

\*every source, including the picture

\*all information in the template

Deadlines:

Date	task to complete
Mar 11, 2010	Have an organism selected. Find three reliable sources with information about your organism.
Mar 12, 2010	Add your organism's location to our map.
Mar 15, 2010	Write five questions you want to know about your ocean organism.
Mar 16, 2010	Show Mr. Beyer a sketch of your model with a list of materials needed.
Mar 17, 2010	Submit a revised sketch of your model with a list of materials needed.
Mar 18, 2010	Submit a finished wiki page about your organism
Mar 23, 2010	Turn in your completed creature.
